

Special Merkin Institute for Translational Research Event

The David Dreier ~ Neil Serebryany Lecture

Keynote speaker:

Jeanne Loring, Ph.D.

Tuesday, Sept. 29th at 4:00 pm, Chen 100

Refreshments @ 3:30 pm, Chen Breezeway

Hosted by MITR Director and Davis Leadership Chair Viviana Gradinaru, PhD

Seminar Abstract:

(TBA)

Speaker Bio:

A noted stem cell pioneer, entrepreneur, and AIMBE Fellow, Dr. Jeanne Loring is a Professor (emerita) at the Scripps Research Institute, where she researched the use of stem cell technology to address neurological diseases and served as founding Director of The Center for Regenerative Medicine. Alongside her distinguished career in academia and in shaping public policy on the ethical generation and use of stem cell technologies, Loring founded two companies: Arcos Biosciences and Aspen Neuroscience Inc., with the latter biotech specializing in the development of personalized stem cell-derived dopamine neuron replacement therapy for Parkinson's disease.
